

BOC-3.5

3.5" CARVEL BOLLARD

As an efficient visual cue used to prevent vehicles from entering a prohibited lane, the 3.5-inch steel bollard with reflective sheeting is made of powder-coated galvanized steel and four (4) recessed reflective sheeting bands. The BOC3548 is therefore rugged and durable, and highly visible day and night. Also simple to install, it attaches to the bollard anchor and is easily removed at the end of the season (see the corresponding product page for details). Whether channelizing traffic, marking bike paths or enhancing signage, the BOC3548 improves the safety for all road users.

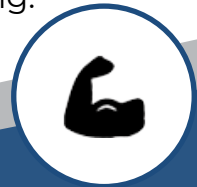

Available in black with white or yellow reflective sheeting.
