

KAMELION-12.5 RADAR SPEED FEEDBACK SIGN

The full matrix Kamelion-12.5 radar speed feedback sign offers so many advantages over conventional speed displays. The screen of this traffic sign allows you to display 320 mm (12.5") digits in green, yellow or red which improves drivers' perception reaction time. An RGB full matrix screen displays preprogrammed or programmable pictograms, emoji or text messages that interact positively with drivers. Two built-in RRFBs can be set if needed to alert when excessive overspeeding is reached. These three elements make the Kamelion one of the most efficient speed reduction tools on the market and a great option to achieve Vision Zero.
